

Domino

Fast Video Floor Solution

Dominos have been developed by PRG Projects in order to be able to meet the short set-up and change-over times of an LED flooring for the Concert Touring and Festival segment. Not only do the Dominos dramatically reduce the set-up time for an LED floor on stage, they also are transported in especially fitted dollies, which contain 6 risers each.

Specifications:

- One Domino is composed of 1 or 2 ROE BM4 LED floor tiles
- Integrated magnets for fast and easy assembly of the LED floor with self-locating auto-guide system
- Ideal for concert touring and festivals allowing fast set-up times and changeovers
- Integrated cable management
- Transport in customized dollies, which can contain a maximum of 6 double Dominos. Height allows for a lower hold airfreight.

Technical Details:

- Single Domino 609,5 x 609,5 x 204,5 mm
24 x 24 x 8 in (LxWxH);
33 kg / 72,75 lbs LED included
- Double Domino 1219 x 609,5 x 204,5 mm
48 x 24 x 8 in (LxWxH);
59 kg / 130 lbs LED included
- Dolly: 1421 x 762 x 1598 mm
55,94 x 30 x 62,91 in (LxWxH)
- Max. 1000 kg/m² // 204.82 lb/ft²
- Max. 400 kg/0,1 m² // 81.93 lb/0,1ft point Load
